

12. Such headgates, diversion and measuring devices must be installed as directed by the State Engineer and such maintenance of both the natural channel and diversion canals should be effected as directed by the State Engineer.

13. It is recommended that the rights to the use of surface water within this area included in this proposed determination be decreed to the various parties substantially as set forth herein with the provision to include the underground water sources in the area of this determination at such time as the State Engineer has completed hydrographic surveys and received all water users' claims covering underground water sources in the described area. It is further recommended that the Court require

that the State Engineer, at periodic intervals of not less than five years, make his report to the Court for inclusion in a supplemental order or decree, said report to include adjustments, corrections of names of owners and of their addresses, action taken on pending applications, and such other matters as time may indicate to the Court to be just and proper.

14. In all matters whatsoever pertaining to this proposed determination of water rights, the services and assistance of the office of the State Engineer are and shall remain available to the Court.

Dated this 15 day of January, 1962

Wayne D. Cribble
WAYNE D. CRIBBLE
STATE ENGINEER
